Doing a Systematic Review | SAGE Publications Ltd
Why do a systematic review? A well done systematic review is a major contribution to the literature. Why not? The requirements in time and effort are massive. Cochrane estimates one year from conception to completion. This does not including time for review, revision and publication. The time from start to end is likely 18-24 months!

More about pros and cons of doing a systematic review ...
Doing a Systematic Review 22 Introduction This chapter focuses on how you can co-ordinate your review activities, and sug-gests how you can employ the resources at your disposal to maximize the chances that the review will progress smoothly. We start by helping you to consider the key resources available to you before you start your review.

DOING A SYSTEMATIC REVIEW - SAGE Publications
Frequently people ask what is a systematic review, what is the point, how does it differ from a normal literature review or meta-analysis, and what is the first thing I do to get started? To address the first point, a systematic review is: a systematic search of literature through designated and ...
**Tips and tricks in performing a systematic review**
The PRISMA statement is essential reading before starting a systematic literature review. Editors increasingly expect authors of systematic reviews to use PRISMA or similar guidelines. The PRISMA checklist will guide you on HOW to develop a systematic review protocol and WHAT to include when writing up your review.
