Intelligent Control A Hybrid Approach Based On Fuzzy Logic Neural Networks And Genetic Algorithms Studies In Computational Intelligence

Intelligent Control A Hybrid Approach

There has been a few number of literature surveys on HEV topic. Several review papers have focused on the general hybrid configurations, power electronic components, and energy management strategies of HEV. But, there is a lack of published papers which present a comprehensive overview of HEV including hybrid powertrain configurations, power electronic components and...

In artificial intelligence, an intelligent agent (IA) refers to an autonomous entity which acts, directing its activity towards achieving goals (i.e. it is an agent), upon an environment using observation through sensors and consequent actuators (i.e. it is intelligent). [citation needed] Intelligent agents may also learn or use knowledge to achieve their goals.

We are going through a technology transformation that is unlocking new scenarios that were simply not possible before. Smart sensors and connected devices are breathing new life into industrial equipment from factories to farms, smart cities to homes, while new devices are increasingly cloud connected by default – whether it’s a car or a refrigerator.

Microsoft Azure enables a new wave of edge computing. Here...

Published data from 2005–2016 regarding intelligent manufacturing have been gathered from the Scopus database, which shows a steady increase in papers on this topic. Fig. 1(a) shows the published documents on intelligent manufacturing from 2005 to 2016. From 2005 to 2006, the number of articles increased sharply, from around 100 to 150; from 2007 to 2014, the number then increased at a...

Adaptive control is the control method used by a controller which must adapt to a controlled system
with parameters which vary, or are initially uncertain. For example, as an aircraft flies, its mass will
slowly decrease as a result of fuel consumption; a control law is needed that adapts itself to such
changing conditions.
